

Advanced radiotherapy treatment using state of the art technology

At Life Rosepark Hospital, our on-site, state of the art oncology unit provides the best possible outcomes for its patients whilst providing patient-centered care and support.

Our advanced technology includes the latest in Varian TrueBeam® Technology:

The TrueBeam® radiotherapy system is built with human needs in mind - it administers the precise dose required quickly and efficiently. This technology is designed to treat cancer wherever it is found in the body, and is flexible enough to meet your clinical needs as well.

- Flexible treatment options
- Advanced imaging
 - Advanced patient positioning modalities in the form of onboard Cone Beam CT*
- High precision dosage control and streamlined treatments
 - Volumetric Modulated Arc Therapy treatment for more precise dose delivery and better healthy organ protection*
- Safe and reliable

Making life better
