

Advanced radiotherapy treatment using state of the art technology

Life Vincent Pallotti Hospital is committed to delivering the very best oncology care and our dedication to excellence has led to the acquisition of powerful technology.

Substantial investments have been made in technologies to put the oncology centre at the forefront of advanced treatments in surgical-, medical-, gynaecological- and radiation oncology.

Our advanced technology includes:

- State of the art Novalis Treatment Delivery System
- Image guided radiosurgery for tumour motion monitoring
- Respiratory gating (respiration triggered dosage system)
- Minimally invasive frameless radiosurgery for patient comfort
- Sterotactic Body Radiotherapy (SBRT)
- Ultra-modern immobilisation
- BrainLab iPlan System for stereotactic radiosurgery
- BrainLab Elements System used to treat multiple brain metastasis simultaneously

Making life better

Our radiation oncologists:

Dr Lisa Dalmeyer

021 201 1299

Dr Jacqueline Hall

021 532 0343

Dr Louis Kathan

021 506 5606

Dr Krystyna Marszalek

021 531 0099

Dr Heide Hart

021 944 3700

Dr Johann Raats

021 944 3700

Breast diseases clinic:

Dr Irene Boeddinghaus

021 531 6924

Dr Anne Gudgeon

021 531 6924

Treatment and services (offered by oncologists)

The oncology centre offers a complete complement of care tailored to each patient's needs. We provide advanced care for both rare and common types of cancer.

Types of cancer treated include:

- Breast cancer
- Colorectal cancer
- Gynaecological cancer
- Urological cancers
- Lung cancer
- Melanoma
- Haepatobiliary cancers
- Sarcoma
- Gastrointestinal cancers
- Pancreatic cancers
- Endocrine and neuroendocrine cancers
- Brain tumours - benign and malignant

Some of the indications for stereostatic radiotherapy are (however not limited to):

- Acoustic neuromas
- Arteriovenous Malformations (AVM's)
- Metastases in all sites
- Liver tumours
- Lung tumours
- Meningiomas
- Pituitary adenomas
- Gliomas
- Cavernous angiomas
- Craniopharyngiomas
- Spinal tumours
- Recurrent brain tumours
- Trigeminal neuralgia
